

INVESTMENT CASTING INSTITUTE BIBLIOGRAPHY

SECTION 1
ALLOYS

YEAR	INDEX #	SOURCE #	TITLE	PAGE AMOUNT
1980	1:30	22	Formation of inclusions in Hafnium Bearing Superalloys Willard H. Sutton, Gernant E. Maurer	21
1981	1:31	28	Continuous Cast Remelt Stock: An Evaluation M. F. Kelly	10
	1:32	28	Vacuum Degassed Remelt Alloy	17
	1:33	28	Development of high performance IN718 Alloy investment castings for compressor components P. G. Honore, L. F. Norris and L. E. Dardi	49
	1:35	31	Continuous Cast Remelt Stock: An Update M. F. Kelly	17
	1:36	31	Alloy Separation and Verification Jack DeHom	5
	1:37	31	Residual Elements - Where do they come from and what effect do they have on castings Steve Morykwas	19
	1:39	31	Conservation of Materials at the Howmet Turbine Components Corporation Alloy Division J. R. Mihalisin	7
1982	1:40	32	Alloy Separation Through Magnetic, Spot and Spark Testing Mike Simmons	19
	1:41	34	Single Crystal Alloys for Gas Turbine Blades J. E. Northwood, M. R. Winstone and J.C. Greenbank	15
1982	1:43	32	Metallurgical Aspects of Quality Control in the Production of Premium Quality Aluminum Investment Castings for the Aerospace Industry Steve Kennerknecht	53
1983	1:44	35	Effects of Nitrogen and Silicon on the Microstructure and Properties of the Nickel Base Alloy MAR M002 G. E. Durber	17
	1:45	35	D. S. and Single Crystal Casting D. C. Pratt	9

INVESTMENT CASTING INSTITUTE BIBLIOGRAPHY

YEAR	INDEX #	SOURCE #	TITLE	PAGE AMOUNT
	1:46	35	Production, Properties and Applications of Titanium Investment Castings C. Liesner	6
	1:47	36	Cost Benefit Analysis of Master Alloy T. Klemp III, J. I. Snowden, R. J. Quigg, and M. W. Carr	14
	1:48	36	Aluminum Castings - Today's Technology James Logan	4
	1:49	36	Development of the Single Crystal Alloys CM SX-2 and CM SX-3 for Advanced Technology Turbine Engines K. Harris, G. L. Erickson and R. E. Schwer	11
1984	1:50	37	Monitoring the Cooling Curve During Solidification of Aluminum Castings Helps to Minimize Scrap D. Apelian and Nicholas G. Walker	6
	1:51	37	Cost and Property Benefits of Induction Melted/AOD Refined/Continuous Cast Master Alloy T. Klemp III, J. I. Snowden and R. E. Schwer	11
	1:52	37	Turbo 25 Nickel-Base Superalloy John Mihalisin	13
	1:53	37	The Development and Application of CM 718 Premium SQ for Critical Cast Structural Components G. L. Erickson, K. Harris and R. E. Schwer	19
1985	1:54	39	Melt Quality Control of Aluminium Alloys J. P. Cleave, BFN Metals Technology Centre	6
1986	1:55	40	The Development of a Low Strategic Element Hot Corrosion Resistant Cast Nickel-Based Alloy - UDM56 P. Keefe, G. Maurer, W. Boesch, Special Metals Corp.	27
	1:56	40	A New Wear Resistant Stainless Steel for the Investment Casting Industry William J. Schumacher, Armco Research & Technology	13
	1:57	40	The Production of Super-Sized, Super Clean 17-4PH Heats David J. Drage, Remelt Sources, Inc.	22
1987	1:58	41	Computer Model for Reaction Kinetics of VIM of Nickel-Base Alloys K. Yeum and D. R. Poirier, Dept of Materials Science & Engineering, The University of Arizona	33

INVESTMENT CASTING INSTITUTE BIBLIOGRAPHY

YEAR	INDEX #	SOURCE #	TITLE	PAGE AMOUNT
	1:59	42	New Nickel-Base Investment-Casting Alloys IN-6201 and IN-6203 S. W. K. Shaw and M. J. Fleetwood, Inco Engineered Products Ltd.	27
	1:60	42	Advances in Titanium Casting F. Hauzeur and P. J. Bridges, Inco Engineered Products Ltd.	10
1988	1:61	43	Latest Developments in Nickel-Base Superalloys Richard J. Quigg, Cannon-Muskegon Corporation	10
	1:62	43	ARMCO® NP607: An Alternative to the Austenitic Nickel Cast Irons W. J. Schumacher, Armco Inc.	15
	1:63	44	Low Density Single Crystal Superalloy CMSX-6® J. Wortmann and R. Wege, Motoren-Und Turbinen-Union K. Harris, G. L. Erickson and R. E. Schwer, Cannon-Muskegon Corp.	17
1989	1:64	45	Hastelloy® Alloy C-22: Corrosion-Resistant Nickel-Base Alloy Castings and Wrought Products J. D. Smith and P. E. Manning, Haynes International Inc.	11
	1:65	45	Armco® PH13-8 MO®: The Ultimate High Strength Stainless Steel William J. Schumacher, Armco, Inc.	13
	1:66	45	Manufacture of 17-4 PH Investment Casting Billets Dr. D. A. Whittaker, Atlas Specialty Steels	20
	1:67	45	Effects of HIPing Fine Grain Alloy 718 Armida Oradei and John F. Radavich, Purdue University	15
	1:68	46	The Expanding Role of Investment-Cast Nickel-Based Superalloys for High Temperature Service W. J. Molloy, Nickel Development Institute	15 21
1990	1:69	47	Ultimet™ Alloy: A Material Resistant to Corrosion and Water P. Crook and J. D. Smith, Haynes International Inc. Dr. Richard J. Quigg, Cannon-Muskegon Corporation	15
1993	1:70	53	Recent Developments in Cast Superalloys	11
	1:71	54	The Development of Vacuum Cast Hastelloy Alloy® C-22 Paul Crook, Galen Hodge, Haynes International; Greg Miller, Miller Castings Inc; Ken Harris, John Eridon, Steve Sikkenga, Cannon-Muskegon Corporation.	10
1994	1:72	56	Investment Cast Gamma and XD™ Gamma Titanium Aluminide Components for Aerospace and Automotive Applications D. E. Larsen, Jr., and D. A. Wheeler, Howmet Corporation	12

INVESTMENT CASTING INSTITUTE BIBLIOGRAPHY

YEAR	INDEX #	SOURCE #	TITLE	PAGE AMOUNT
	1:73	56	Duplex Stainless Steels Steven L. Sikkenga, Cannon-Muskegon Corporation	8
1996	1:74	58	Superalloys in Industrial Gas Turbines - An Overview Jacqueline B. Wahl, Ken Harris, Cannon-Muskegon Corporation (SPS Technologies)	12
	1:75	58	C. S. Lim, L. Siaminwe and A. J. Clegg, University of Technology, Loughborough, U.K.	18
2001	1:76	67	Raw Materials for Superalloys Paul Michael Barnett, Ross & Catherall Ltd., Sheffield	19
2002	1:77	69	Thin Wall Titanium Structural Castings J. Schurkamp, S. Veeck, P. Follansbee, Howmet Research Corporation	7
2005	1:78	72	Investment Casting Magnesium – A Light Weight Solution Dr. Paul Lyon, Magnesium Elektron	10
	1:79	72	Development of Ultra High Strength Weathering Steel and Stainless Steel Alloys Mike Wyte, FS Precision Tech	11
2006	1:80	73	Improved Melting Stock for the Investment Casting Industry Brett Krause, Bohler Uddeholm	15
2009	1:81	76	High performance Investment Cast 17-4 Stainless Steel & Beyond Rachel Abrahams, Penn State University	24
2010	1:82	77	Composition & Processing of Ultra High-Strength Low-Alloy Steels for Investment Casting Rachel Abrahams, Penn State University	24
